These guys are absolutely phenomenal. I would recommend these guys for any software/hardware needs. Slow computer? V2. System errors? V2. These guys are hands down the best!. I'll happily put my reputation on the line for them. Anthony was very helpful and explained many things to me and kept me in the know the whole time. His colleagues were also very supportive and helped me out when he was serving other customers. If you computer problems, go to robotechpc.com and let the fun begin! A lot of bang for a little amount of green. You'll feel like you have a new computer when this is done!

I cannot say thank you enough for helping me with my computer issues. Anthony was so helpful and showed so much patience with walking me through the whole process. I wish there was a way to choose more than 3 options about what I liked about your company. I will definitely come back to your company for any other computer issues I may have in the future.

I had a nasty virus on my laptop. I contacted Thumbtack for help. Anthony was one of the contractors who responded to my request for help. Since I was going out of town in a few days, I didn't have a lot of time to deal with this. Anthony suggested that we first try to fix the problem remotely. I wasn't totally convinced, but he was so knowledgeable that I followed his instructions. It worked. All I had to do was follow his instructions, then let the downloaded software kill the virus. Needless to say I was ecstatic. It took a little over an hour for the software to do its thing. Anthony texted periodically to see at what step the software was on. He was very professional and reassuring during the entire process. Best of all, I didn't have to take my laptop anywhere or wait for a tech to come to my home. I would definitely call Anthony again if I need help.

When my desktop computer was running slow & freezing up, I was fortunate enough to find a professional repair person, Anthony, who was not only knowledgeable but very friendly. I downloaded his proprietary AI program that made a comprehensive system check and repair; a few stalls occurred during this process, but a technician quickly entered my computer remotely to set it on course again. The repair process took longer than usual - not unlike a housecleaner taking longer to straighten out a pigsty! I am very pleased now with my computer performance, which may be surpassed only with my positive experience I had with Anthony. He responded to my concerns quickly and took time to explain in detail. Additionally, he went above and beyond - devoting a few more hours without charge - to investigate other problem areas, as well as to map out a network connection to a second computer that I wanted. What a value, a find, a treasure.
